Abstract

The evaluation of the development level of rural ecological environment is an important guide to the development level of rural areas and the improvement of rural environment, as well as an important work to improve the ecological quality and ensure that people live and work in peace and happiness. In order to better achieve rural ecological environmental protection. This division uses the hierarchical analysis method to analyze the development level of rural ecological environment, and proposes specific improvement measures to continuously promote rural ecological environmental protection, improve and enhance the quality of rural ecological environment, and provide corresponding technical support to promote rural revitalization.

Key words: ecological environment, development level, hierarchical analysis method, rural
